Criteria for Establishment, Modification, Renewal or Termination of a District.

Section 115-5-1. Criteria.

The following criteria shall be used as a guide in recommendations and decisions on whether to establish, modify, renew, continue or terminate local agricultural and forestal districts:

Criteria Group A: All the following criteria should be met by all proposed districts:

(1) All district acreage should be currently devoted to agricultural use or forestal use or should be undeveloped and suitable for such uses, except that a reasonable amount of residential or other use, related to the agricultural or forestal use and generally not more than five (5) acres per district, may be included.

(2) All lands in the district should be zoned to the R-P, R-C, R-A or R-E District.

(3) The district should be consistent with the Comprehensive Plan. The following land uses identified in the Plan are appropriate for a district: .1-.2 dwelling unit per acre, .2 dwelling unit per acre, .2-.5 dwelling unit per acre, .5-1 dwelling unit per acre, Private Recreation, Private Open Space, Public Park, Agriculture, Environmental Quality Corridor. Lands not planned as such may be considered for a district if they meet at least three (3) of Criteria Group B.

(4) A majority of the surrounding land within one-quarter mile of the district should be planned according to the Comprehensive Plan for uses identified in (a)(3), above. Exceptions may be made for lands located at the edge of a planned growth area or which meet at least three (3) of the criteria of Criteria Group B, if no conflicts with surrounding uses, existing and planned, are evident or likely.

(5) All farms to be included in a district should be at least twenty (20) acres in size. A farm may include several parcels of land; however, all parcels must have the same owner or else owners must be members of the same immediate family or a family trust or family corporation. A farm must include at least fifteen (15) acres of land in agricultural use. A farm may include noncontiguous parcels within one (1) mile of the core acreage (the largest parcel or group of contiguous parcels or the parcel where the farm buildings are located) as long the noncontiguous parcels are predominately agricultural in use and as long as the total acreage of each individual farm (including contiguous and noncontiguous lands) is at least twenty (20) acres.

(6) All other properties not included in a farm as defined in (a)(5), that is, forested and partially forested properties, and properties with less than fifteen (15) acres in agricultural use, should be at least twenty (20) acres in size. These properties may contain several parcels; but all parcels must be contiguous, and all must have the same owner, or else owners must be members of the same family or a family trust or family corporation.

(7) Approximately two-thirds of the land in agricultural use in the district should contain Class I, II, III or IV soils as defined by the USDA Soil Conservation Service. Districts having more than one-third of the land in agricultural use containing Classes V--VIII soils may be considered if such lands have been improved and managed to reduce soil erosion, maintain soil nutrients, and reduce nonpoint source pollution.

(8) Agricultural land in the district should be used in a planned program of soil management, soil conservation and pollution control practices which is intended to reduce or prevent soil erosion, maintain soil nutrients, control practices which is intended to reduce or prevent soil erosion, maintain soil nutrients, control brush, woody growth and noxious weeds on crop land, hay land and pasture land, and reduce nonpoint source pollution. Exceptions to this criterion may be made only for those agricultural lands which upon initial application for the

establishment of a district are not used in such a program but for which a conservation plan is being prepared or has been requested from the Northern Virginia Soil and Water Conservation District.

(9) Forest land and undeveloped land in the district should be kept in an undisturbed state, or if periodically harvested or experiencing erosion problems, shall be used in a planned program of soil management, soil conservation and pollution control practices which is intended to reduce or prevent soil erosion, maintain soil nutrients and reduce nonpoint source pollution. Exceptions to this criterion may be made only for those lands which upon initial application for the establishment of a district are not used in such a program but for which a conservation plan is being prepared or has been requested from the Northern Virginia Soil and Water Conservation District or the Virginia Division of Forestry.

(10) There should be evidence of a history of investment in farm or forest improvements or other commitments to continuing agricultural or forestal use in the district. In particular, districts with no history of investments in farm or forest improvements must evidence a firm commitment to agricultural or forest use for at least the life of the district.

(b) *Criteria Group B:* In addition to meeting all of Criteria Group A, all properties in the district should meet as well at least two (2) of the following criteria:

(1) Farm and/or forest products have been regularly produced and sold from the property during the last five (5) years.

(2) The land provides scenic vistas, improves the aesthetic quality of views from County roads or contributes to maintaining the existing rural character of an area.

(3) The property contains an historically and/or archaeologically significant site which would be preserved in conjunction with the establishment of a district. A site that is listed on the Federal Registry of Historic Places, the State Registry of Historic Places and/or the County Inventory of Historic Places will be considered historically and/or archaeologically significant. A property which contains a site that is considered to be archaeologically significant by the County Archaeologist, or is located in an area with a high potential for archaeological sites, provided that the property owner has agreed to permit the County Archaeologist access to the site, may also be considered historically and/or archaeologically significant.

(4) Farming or forestry operations practice unique or particularly effective water pollution control measures (BMP's).

(5) The land is zoned R-A, R-P or R-C.

(6) The land is entirely in a permanent open space easement. (13-83-115; 21-95-115.)
