

TREE OF HEAVEN

Ailanthus altissima

The exotic and invasive tree of heaven (*Ailanthus altissima*) is the preferred host of the invasive insect pest spotted lanternfly (*Lycorma delicatula*).

Fairfax County urban foresters want your help to locate and report observations of the invasive tree of heaven.

IDENTIFY IT

TREE OF HEAVEN

Ailanthus altissima

REPORT IT

Become a first detector in the effort to manage spotted lanternfly! **EDDMapS** is a mobile application used to report invasive species to help Early Detection and Rapid Response programs. Tree of heaven location reports can be made directly in the app. Please include several photos to ensure your record is easily verified.

How to get started with EDDMapS

1. Download and install the **EDDMapS** app from the Apple App Store or Google Play store or use www.eddmaps.org
2. Create an account with **EDDMapS**
3. Report your observations
